

Cheng Feng Enterprises Co, Ltd. Live Boldly: Cultivate the Colors in Your Life

Cheng Feng Enterprise has committed to pigment-related products for more than a decade. From traditional industrial to modern applications, Cheng Feng endeavors to expand its contribution in plenty of applications in our daily life. TITAS2022 we will introduce you more about it.

Over the years, rapid technical evolution broadened the possibility of pigments. Nowadays, colors made of pigments can be seen almost everywhere in our daily lives.

Cheng Feng will present to you at TITAS2022 various applications of colorants made by pigments seen from water-based gravity, digital printings, and even hot items in the field of epidemic prevention. Colors are no longer limited to visual aesthetics, their functions and innovative applications are even more astonishing.

When applying pigments to fabrics, despite the color performance, Cheng Feng has input many efforts on environmental protection issues. The technology of presenting pigment with a dye effect is a brand new perspective for the textile industry. Through this perspective, Cheng Feng intends to present an optional solution to our end users and make sure colorants made are qualified for worldwide environmental regulations.

The core value of every colorant series is green, environmental, and carbon emissions always come first. Therefore, coordinating with top mega-world industries, because we believe green products only come from safe and qualified chemicals. We look forward to presenting you with every series of colorants during TITAS2022.
