

## Sheng Ye Textile Trading Co., Ltd.

### Eco Ahead: 100% Recyclable 2L Fabric

Sheng Ye is a fabric supplier with innovative and sustainable textile solutions. We provide high-tech and functional woven and knit fabrics with high added values for many leading brands worldwide. Our products enable designers to solve problems, improve outcomes and sell them globally.

Sheng Ye products range from quick-dry and cooling fabrics to warm mid-layers and insulations to weather and waterproof outerwear. Ultimately, our fabrics keep people Warm, Dry, Cool, and Comfort in all conditions.

With first-class professionalism and a standardized management system, we can control and supervise the entire supply chain: from weaving, and dyeing to the final product, following high standards and high quality.

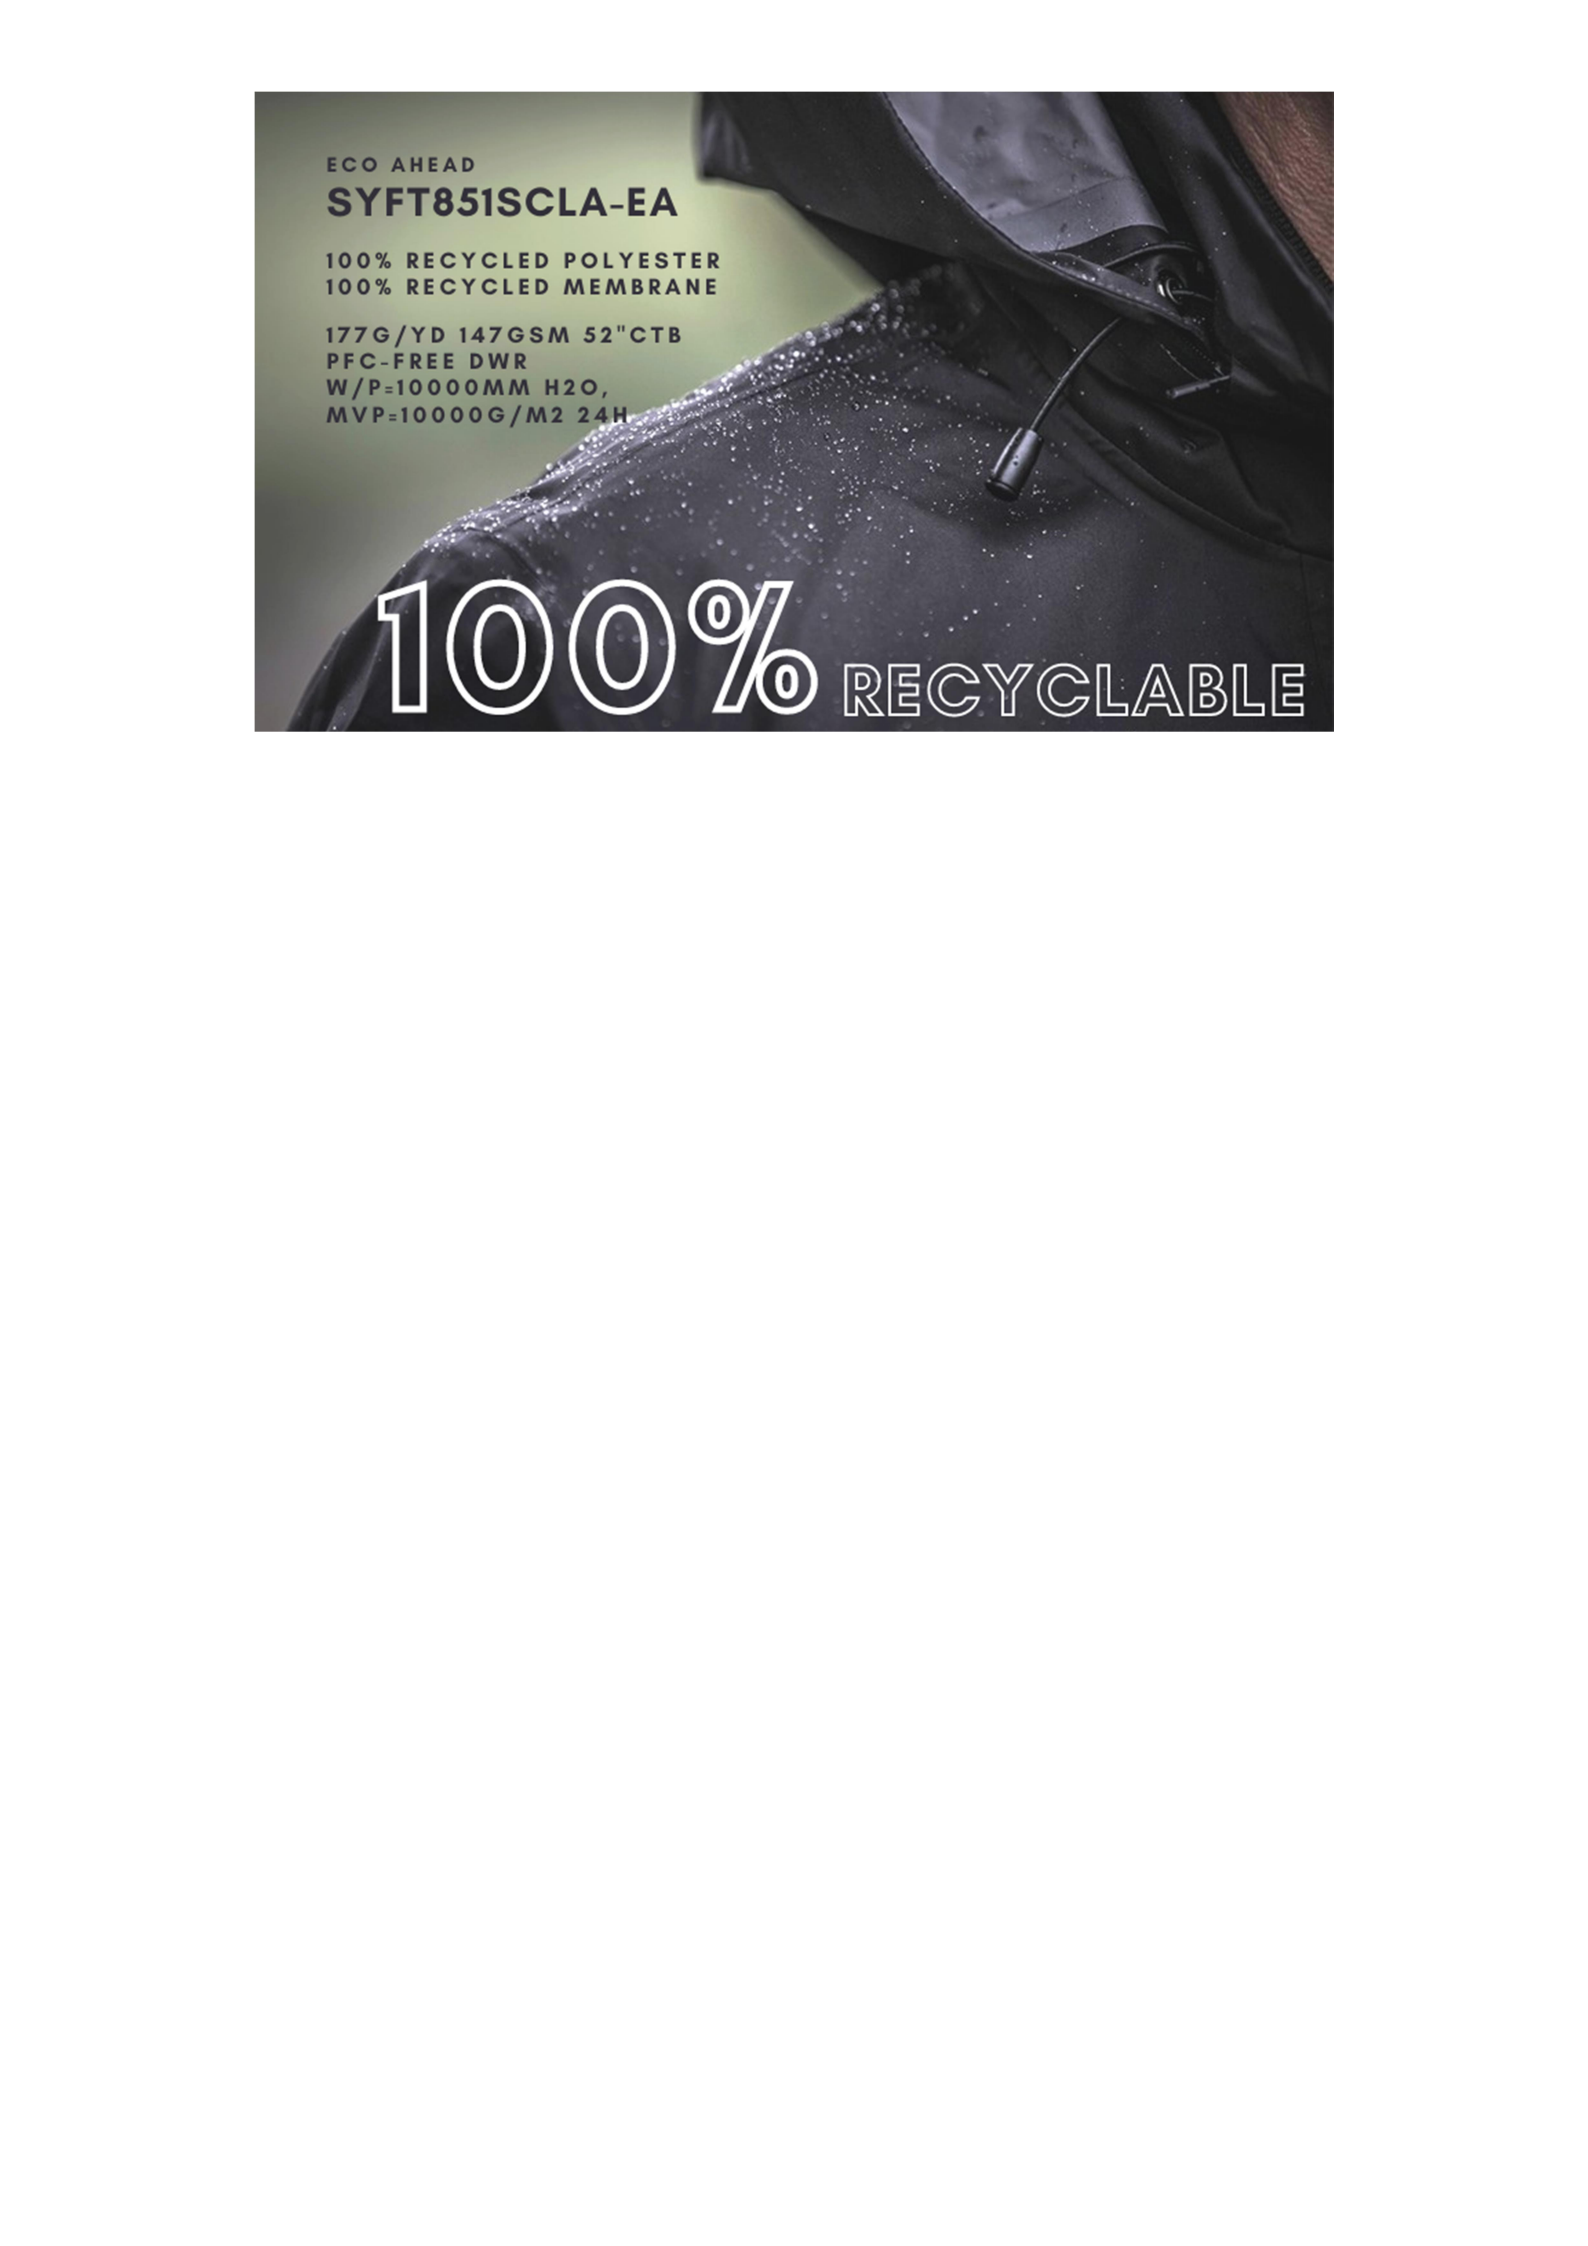

We focus on functional fabrics and constantly research and development to stay ahead of the curve, quickly solve customer needs and create new value for customer products.

Sheng Ye launched waterproof and moisture-permeable fabrics with the concept of environmental protection and circular economy: **Eco Ahead series**. Different from traditional composite fabrics: **"The 2-layer waterproof recycled fabrics of Eco Ahead Series, in addition to using recycled materials, can be 100% recyclable after use, including membranes."** After the recycling process, it can not only turn used clothes into new garments but also be made into industrial plastic products.

Recycling and remanufacturing old clothes to make new garments can reduce carbon emissions by 44%, compared to directly entering the incineration stage without recycling.

Recycling and reusing used clothes is the best solution to solve textile waste truly.
