

This year TITAS is focusing on that LIBOLON put a premium on climate change, natural resource reduction, industrial pollution and product safety issues from global consumers. LIBOLON has developed the green circulation concept by Water circular economy, Green recycle CRZ (LIBOLON Recycling Technology), and the sustainable development is based on supreme standard brand new vision.

LIBOLON is integrated from polymer, spinning, texturing, secondary processing, knitting/weaving, dyeing and post finishing in order to satisfy for the product request from different business sectors and reach wide application. This ensures the fastest and most efficient product but also enhances our production in "sustainability" , "Digitalization" , "Sophiscation" . We combine the overseas integrated production of yarn, weaving and knitting from PT. INDONESIA LIBOLON FIBER SYSTEM and also phase in "Taiwan for R&D, Overseas for Production" . LIBOLON also expands the production of BOPA for the material in the electronic & functionality film industry.

Our exhibited subject carries out LIBOLON's first overseas business distribution in order to extend diversified products, and the concept of eco-friendly circular economy is fulfilled inside the enterprise moving forwards to sustainable business.
