

SUMMER SMILE INTERNATIONAL Co., Ltd.

Made in Taiwan

SUMMER SMILE INTERNATIONAL CO. will once again bring you a new and different experience at the TITAS2022 exhibition this year. We have experts in figure micro-sculpting for health and body beauty. Thinking outside of the box, no longer in the "traditional" way of underwear. Let fashion go with functions, and combine technology with environmental protection. Our first-class design team deeply explores the needs of women, tailor-made according to the body of the users. Within the tailoring method of ergonomics, regardless of prenatal or postnatal, young or mature age, to create a well-proportioned figure. Knit functional yarns into elastic fabrics, such as coffee yarn, pearl yarn, collagen yarn, cool yarn, and other special functional fabrics to make shapewear. The exclusive bra is equipped with patented massage soft beads, which can effectively massage the breast and breast tissue, and the fabric is breathable and elastic. Launch environmental protection fashion-leak-proof antibacterial hipsters for menstruation in 2021.

The application of copper ion fiber fabric, bamboo charcoal fiber fabric, coffee yarn, waterproof fabric, etc., allows women to wear leak-proof antibacterial hipsters during their menstruation in addition to sanitary pads or tampons, to achieve double protection. The pelvic cavity and the urethra are loosened during childbirth, and the support becomes weak so that you can wear leak-proof antibacterial hipster to reduce the discomfort of postpartum urinary incontinence.

SUMMER SMILE Co., Ltd. upholds the spirit of enterprise, integrating technology and fashion into your undergarments, achieving a comfortable feeling on top of the world while wearing, and pampering your skin.
