AI Machine Vision Corp.

AI Machine Vision Corp. takes the AI-AOI intelligent machine vision software technology as the core, horizontally integrates mechanical, electronic control and optical technology, and provides customers with a complete AI-AOI machine vision automatic inspection equipment and AI intelligent manufacturing system integration plan to assist Customers realize the "intelligent production line" of Industry 4.0 smart manufacturing.

Our advantages:

● **Professional R&D team**

The R&D team has deep AI & AOI intelligent machine vision software technology R&D and system integration capabilities.

● **Excellent Core Technology**

Our company has comprehensive and high-quality AOI professional capabilities: artificial intelligence, optical machine design, image recognition, electromechanical integration, IoT, and big data.

● **Efficient project management**

Five steps for project execution: Start → planning → carried out → control → Closed cases are managed and properly posted!

● **Intimate after-sales service**

After the delivery and acceptance are completed, we will still serve customers at any time.

Our product:

AI Machine Vision Corp. adheres to the corporate service concept, and combines "AI technology" with "textile industry" products to achieve intelligent manufacturing "smart production lines".
