

## Chyau Fu Paper Printing Co., Ltd.

### NYMOSA - Recycled Abrasion Resistant Yarn - Light Weight and Eco Friendly

**N**YMOSA yarn is a recycled polyester-based abrasion-resistant yarn. The NYMOSA fabric does not use additional post-working processes (such as coating or lamination) to reach the abrasion-resistant goal. As a result, the NYMOSA fabric reduces energy and water consumption.

Chyau Fu has utilized digital sublimation technology to make more applications in NYMOSA fabrics. Chyau Fu has received a patent for the abrasion-resistant fabric and its applications. In addition, Chyau Fu received the 2020 TOG Award Winners for the lightweight NYMOSA fabric backpack.

Chyau Fu has OEKO-TEX and GRS certificates. Chyau Fu can provide one-stop services for clients, such as weaving, dyeing, sublimation printing, TPU lamination, TPU printing, and Embossing. Our staff has professional knowledge and experience in fabric production, TPU lamination, and printing to help clients identify and solve most fabric production problems. We look forward to seeing you at the show.

#### Products and Services:

- TPU lamination & Printing
- Sublimation Printing (Digital printing & gravure printing)
- Fabrics: Polyester, Nylon Fabrics for bags · luggage · travelware · umbrellas · equipments
- Sublimation Paper (for Digital printing & gravure printing)
- Protection Paper
