LIBOLON
力寶龍

In response to the global trend of renewable energy & net zero carbon emissions, LIBOLON puts a premium on climate change, natural resource reduction, industrial pollution, and product safety issues for global consumers. LIBOLON has developed the green circulation concept through water circular economy, green recycling fiber products (RePET® eco-friendly Polyester Recycled Yarn), (ReEcoya® Recycle Dope Dye Yarn), and sustainable development is based on a supreme standard brand new vision.

LIBOLON is integrated from polymer, spinning, texturing, secondary processing, knitting/weaving, dyeing, and post-finishing in order to satisfy the product request from different business sectors and reach wide applications. This ensures the fastest and most efficient product but also enhances our production in "sustainability" , "Digitalization" , and "Sophistication" . We combine the overseas integrated production of yarn, weaving, and knitting from PT. INDONESIA LIBOLON FIBER SYSTEM and also phase in "Taiwan for R&D, Overseas for Production" . LIBOLON also expands the production of BOPA for materials in the electronic & functionality film industry.

Our exhibited subject carries out LIBOLON's first overseas business distribution in order to extend diversified products, and the concept of an eco-friendly circular economy is fulfilled inside the enterprise, moving forwards to sustainable business.
