

Lih Shyang Industrial Co., Ltd.
Formosa Nylon fulfills your needs.

With more than 5 decades of history, Lih Shyang is dedicated to providing the best services and yarns with superior quality for our valued customers. We sincerely welcome you to join us at the exhibition and see our newly released products at TITAS 2022 !

At TITAS 2022, we will demonstrate our Nylon 6 Fine Denier and High Filament Textured Yarn. The thinner the denier, the lighter the products; the higher the filaments, the softer the hand feels. For Lih Shyang Fine Denier and High Filament Textured Yarn, the lowest denier we can do is 20 Denier, and the highest filament we can do is 48 Filaments. In addition to Raw White yarn, Lih Shyang also produces Dope Dyed Black yarn.

Combining decades of experience in dyeing, Lih Shyang can customize colors of Nylon 6 Fine Denier and High Filament Textured Yarn (Yarn Dyed). Using dyed yarn can diversify the range of fabrics and products. And the hand feeling will also be better than dyeing grey fabric. Low MOQ, lots of color choices, even color, and also good color fastness will make your products more competitive.

Formosa Nylon fulfills your needs in "color" , "hand feeling" , and "elasticity" of nylon and polyester. No matter what you request, we will select the most suitable products for you.
