## LET SAFETY BE SEEN

The traditional textile industry enters Central Taiwan Science Park. Light Textile sees your needs!

“EVERYONE NEEDS TO BE SEEN” Light Textile launched LIGHTEMIS® in 2021 - A fine denier yarn combined with elastic and reflective. It can be used in apparel and footwear, providing safety in the dark with high comfort. With LIGHTEMIS® in fabric, giving 360° visibility and protection, everyone can be seen in the dim light and the dark night.

We expect LIGHTEMIS® to bring safety protection to everyone' s attention in the world. A product with LIGHTEMIS® inside provides the comfort you need and does not change the original design. Reflection can be integrated with fashion and daily life. LIGHTEMIS® is always the guardian of the night.

Light Textile adheres to “Let safety be seen” , consistently develops functional fiber with reflection and a glow-in-the-dark effect, and always meets the customer' s requirements.
