

GIFTSTART CO., LTD.

Giftstart, founded in 1982, is one of the professional companies specialized in developing new materials as well as designing and producing labels, patches, emblems, and accessories. Our products have been successfully linked to the global network.

Giftstart reflective/luminous technology was patented by Mr. MOIL Y.C. SHIH with PCT WIPO (World Intellectual Property Organization) NO.: WO2016/192206; NO.3096864 of China and No.1582470; I625556; M520641 of Taiwan, has successfully obtained invention patents from China, USA, Japan, Russia, Vietnam, Indonesia ...etc. The scope of patents covers raw materials and processes. Recently, Giftstart rolled out lighter yarns for knitting and weaving, stronger threads for stitching and embroidery.

Also upgraded the brightness of reflective/luminous treatment on stretch fabrics and waterproof fabrics. The luminous brightness of the reflective and luminous yarn can reach more than ten times that of the traditional luminous yarn. Reflective luminous printing can be printed in color on stretch woven and knitted fabrics.
