

Smart blinds, smart life. Enjoy the beauty of your home

Choose suitable blinds for your window. We have a variety of styles, colors and textures of curtains that can meet your various needs and preferences. Whether you need to adjust the light, block the privacy, or decorate the space, we can provide you with the best solution.

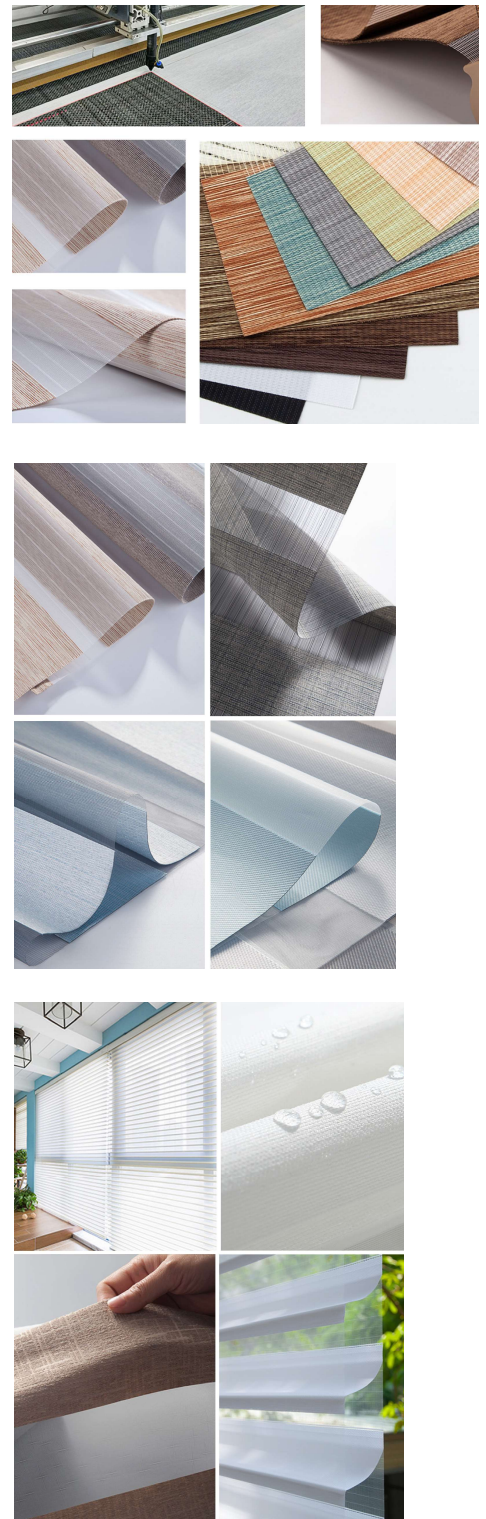

1. Our curtains have the following features:

- Blackout type: can completely block the external light, let you enjoy the dark and quiet sleep environment.
- Colorful type: bright and full of color, with a delicate and shiny texture, bring out a unique decorative effect.
- Double-layer dimming zebra curtain: a double-layer fabric composed of alternating solid and transparent stripes, which produces light grating changes by rotating, enhancing the freedom of adjusting the light.
- Translucent type: light and transparent fabric material, creating a hazy beauty, filtering the dazzling light, dividing the space.

2. Our curtains also have the following operating modes:

- Hand-pull chain: the most common and basic operation mode, convenient and fast.
- Remote control-electric type: use the remote control to operate the curtain, need to connect to the power supply, suitable for zebra curtain, roller blind and gauze curtain.
- Remote control-battery type: use the remote control to operate the curtain, do not need to connect to the power supply, just need to charge regularly, suitable for zebra blinds and roller blind.

3. Our curtains can also be applied to various window types and installation methods:

- Octagonal window, bay window, floor-to-ceiling window: we can customize the appropriate blinds according to your window shape and size.
- Internal installation, external installation, top installation, side installation: we can provide you with the best installation method according to your space needs and preferences.
