

# SHINI ENTERPRISE CO., LTD

INNOVATING FOR A SUSTAINABLE FUTURE

Established in 1962, Shinih Enterprise is one of the world's leading insulation manufacturers. We provide comprehensive solutions to meet diverse market needs, offering a one-stop service to our customers. With 16 facilities in 6 countries, we ensure quick responses to inquiries and provide local services. Shinih® is dedicated to developing high-performance products while exploring ways to

minimize environmental impact and promoting circularity. We prioritize the use of recycled, renewable, and bio-based materials and follow sustainable manufacturing practices. Our facilities and products are certified by bluesign, GRS, and OEKO-TEX STANDARD 100.

## Insulation Materials (Functional Insulation / Bedding / Padding)

Shinih offers a complete and extensive insulation product portfolio which can fit into various market requirements. We also work strategically with brands and our partners to develop customized products with specific functions.

As a market-leading pioneer, Shinih® has been striving for perfection and innovation for decades. Helping our customers succeed and overcome market challenges, we source microfibers, loose fibers, hollow-core fibers, elastic fibers and other materials from world-class manufacturers to develop a wide range of functional insulation products.

Able to meet a variety of specifications for thickness, softness and thermal properties, our product range covers the full spectrum of customers' needs.

# Industrial Materials

(Building Material / Filtration Material/Shopping Bags / Home Textiles /  
Automotive Products / Outdoor Furniture)

Evolving with the times, non-woven fabrics have become an indispensable part of our daily lives. The material is widely applied in medical masks, household vacuum cleaner filter cartridges, automobile air conditioning filters, automobile seat linings, industrial filter buckets and many more. As a leader in the non-woven fabrics industry, Shinih Enterprise is specialized in producing non-woven fabrics for industrial applications such as automobile interior materials, filtration, vibration absorption, flame-retardant material and geotextile.

As a market-leading pioneer, Shinih® has been striving for perfection and innovation for decades. Helping our customers succeed and overcome market challenges, we source microfibers, loose fibers, hollow-core fibers, elastic fibers and other materials from world-class manufacturers to develop a wide range of functional insulation products.

Able to meet a variety of specifications for thickness, softness and thermal properties, our product range covers the full spectrum of customers' needs.
